

PAWAN KUMAR

Senior Software Engineer | Frontend (Angular . React . TypeScript) | GenAI-Enabled Enterprise Platforms
Bengaluru, India . +91-8770386489 . pkofficial000@gmail.com . linkedin.com/in/pawan-kumar-023735159

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience building scalable, enterprise-grade web applications with Angular, React, and TypeScript. Led frontend architecture for GenAI-powered life-sciences platforms, delivering reusable component libraries, real-time collaboration (WebSocket), MS Word Add-ins, and secure SSO/RBAC experiences. Proven record of improving performance (40% faster load), boosting delivery velocity (25-30%), and mentoring engineers in Agile teams. AWS Certified Cloud Practitioner.

TECHNICAL SKILLS

Frontend: Angular (v8+), React (Hooks, Context API), TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3/SCSS, Angular Material, Material UI, Bootstrap, Responsive Design

Architecture & Performance: Micro-frontend-ready modular design, Reusable Component Libraries, Lazy Loading, State Management, Web Performance Optimization, Lighthouse, Chrome DevTools

Backend & Databases: Node.js, Express.js, REST APIs, WebSocket, RabbitMQ, PostgreSQL, MySQL, Firebase

AI & Integrations: GenAI/LLM-powered UI workflows, Quill, TinyMCE, Chart.js, ngx-graph, MS Office Add-ins (Yeoman)

Security: OAuth 2.0, Keycloak SSO, Role-Based Access Control (RBAC), Multi-tenant Authentication, Route Guards

Cloud, Testing & Tools: AWS, Git/GitHub, Jasmine, Karma, Agile/Scrum, Jira, Code Reviews, CI/CD collaboration

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer | Indegene Pvt Ltd, Bengaluru Jan 2020 - Present

- Architected a modular, enterprise-scale document authoring platform (Angular) with WYSIWYG editing, multilingual content, and export capabilities.
- Reduced initial load time by 40%+ through lazy loading, bundle optimization, and Lighthouse/Chrome DevTools performance audits across modules.
- Built shared modules and reusable component libraries, improving development velocity by 30%.
- Applied advanced Angular patterns (custom directives, dynamic forms, route guards, RxJS) to deliver a maintainable enterprise platform.
- Implemented RBAC and dynamic permission-based rendering; integrated Quill and TinyMCE with custom configurations.
- Mentored junior developers; drove sprint planning, story estimation, and code reviews in an Agile/Scrum setup.

Software Trainee | Mountblue Technologies Aug 2019 - Dec 2019

- Built responsive React and Node.js projects, including a Trello-style task manager with drag-and-drop.
- Practiced software engineering best practices in a fast-paced Agile environment.

KEY PROJECTS

Literature Surveillance (LS) - GenAI-powered medical literature platform | Angular, WebSocket, RabbitMQ

- Led frontend architecture and module-level scalability with full ownership of UI decisions.
- Built reusable components, a Google Forms-style dynamic form builder, and a custom XML previewer for structured documents (SRD/BMS).
- Engineered a Google Drive-like file manager using WebSocket and RabbitMQ for real-time uploads and distributed processing.
- Implemented article scheduling and retrieval across PubMed, Embase, and other sources with metadata-driven search filters.
- Integrated GenAI/ML pipelines for automated content extraction and document generation from shortlisted articles.

Medical Writing Platform (MWP) - Agent-based medical writing platform | React, Custom Hooks, MS Word Add-in

- Led frontend development of multiple React modules used in enterprise medical content workflows.
- Built reusable React components and custom hooks, improving maintainability by 40% and cutting feature development time by 25%.
- Developed a Microsoft Word Add-in (React + Yeoman) for in-document authoring, driving 35% higher user adoption.
- Delivered context-aware Word UI for authoring and review scenarios, reducing manual effort by 20%.

Intelligent Content Lifecycle Management System (ICMS) - Angular, TinyMCE, Keycloak

- Customized TinyMCE for rich-text authoring with inline commenting, version control, and AI-driven content suggestions.
- Integrated WebSocket real-time collaboration and Chart.js dashboards for workflow and document tracking.
- Implemented Keycloak OAuth 2.0 SSO, RBAC, and multi-tenant authentication; built lineage graphs with ngx-graph for audit trails.
- Contributed to a scalable workflow engine with dynamic review stages and global time-zone handling.

Slack Clone (Personal Project) - React, Node.js, Firebase

- Real-time messaging app with Firebase Auth, channels, threads, typing indicators, and presence; responsive UI with Material UI.

EDUCATION

B.E. in Computer Science Engineering, NRI Institute of Information Science & Technology - 7.72 CGPA (2019)

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner
- HackerRank Problem Solving (Basic) - Sep 2020; JavaScript - FreeCodeCamp - Sep 2019
- Winner, Code and Connect Hackathon 2025 - Indegene
- Indegene awards: 'Hitting the Mark', 'Best Sprinter', 'Make It Happen'
